

Demonstration of Proposed Features

Date	2 July 2026
Team ID	XXXXXX
Project Name	A Comprehensive Measure of Well-Being
Maximum Marks	1 Mark

Demonstration of Proposed Features:

This document captures all the features proposed during the project planning phase and records whether each feature has been successfully implemented and demonstrated. The Human Development Index (HDI) Prediction System uses a trained Machine Learning model integrated with a Flask web application to predict the HDI category based on user inputs.

S.No	Feature Name	Description	Status (Implemented / Partial / Pending)	Demonstrated (Yes / No)	Remarks
1	User Input Form	Accepts Life Expectancy, Mean Schooling, Expected Schooling and GNI through the Flask web interface.	Implemented	Yes	Working Successfully
2	Machine Learning Model Loading	Loads the trained model.pkl using the Pickle library during application startup	Implemented	Yes	Model Loads Correctly
3	HDI Prediction	Predicts the Human Development Index value using the trained model based on user input.	Implemented	Yes	Accurate Prediction generated
4	HDI Category Classification	Classifies the predicted HDI into Low, Medium, High and Very High Human Development categories.	Implemented	Yes	Category displayed Correctly
5	Result Display	Displays the predicted HDI value and development category on the result page.	Implemented	Yes	User Friendly output

6	Exception Handling	Handles invalid inputs and runtime errors gracefully using try-except blocks	Implemented	Yes	Error messages displayed properly
---	--------------------	--	-------------	-----	-----------------------------------

Feature Implementation Summary

Total Features Implemented	6
Total Features Demonstrated	6
Overall Implementation Rate (%)	100%
Total Features Proposed	6
