| <b>Maximum Marks</b> | 5 Marks                               |

### Code-Layout, Readability and Reusability:

This document evaluates the quality of the code base in terms of its structure, readability, and reusability. Well-organized code with proper naming conventions, comments, and modular design ensures that the project is maintainable and can be extended or reused in future development.

#### Code Layout Checklist:

| S.No | Code Quality Parameter     | Description                                   | Followed (Yes / No / Partial) | Remarks                        |
|------|----------------------------|-----------------------------------------------|-------------------------------|--------------------------------|
| 1    | Consistent Indentation     | Uniform spacing/tabs used throughout the code | Yes                           | Proper indentation             |
| 2    | Proper File Structure      | Files and folders are logically organized     | Yes                           | Templates ,static ,model       |
| 3    | Meaningful Variable Name s | Variables reflect their purpose clearly       | Yes                           | Descriptive names              |
| 4    | Function / Method Names    | Functions are descriptively named             | Yes                           | home(),predict()               |
| 5    | Code Comments              | Inline and block comments explain logic       | Yes                           | Section comments               |
| 6    | Modular Design             | Code is split into reusable functions/modules | Partial                       | Single file ; routes separated |
| 7    | No Redundant Code          | Duplicate or unused code is removed           | Yes                           | Clean implementation           |

|   |                |                                              |     |            |
|---|----------------|----------------------------------------------|-----|------------|
| 8 | Error Handling | Exceptions and errors are handled gracefully | Yes | try/except |
|---|----------------|----------------------------------------------|-----|------------|

### Reusable Components / Modules:

| S. No | Component / Module Name | Language / Technology | Where Reused | Reusability Level (High / Medium / Low) |
|-------|-------------------------|-----------------------|--------------|-----------------------------------------|
| 1     | Flask App               | Python/Flask          | Main app     | High                                    |
| 2     | Prediction              | Python                | Route        | High                                    |
| 3     | Model.pkl               | Pickel                | Prediction   | High                                    |
| 4     | Templates               | HTML                  | UI           | Medium                                  |
| 5     | Static                  | CSS/JS                | Frontend     | Medium                                  |

### Overall Code Quality Assessment:

| Aspect                   | Rating (1-5) | Comments        |
|--------------------------|--------------|-----------------|
| Code Layout & Structure  | 5            | Well organised  |
| Readability              | 5            | Clear           |
| Reusability              | 4            | Can split files |
| Documentation / Comments | 5            | Good            |
| Overall Score            | 4.75/5       | Good            |
