Data Flow Diagram

The DFD illustrates how user input data flows through the Flask application to the trained machine learning model for HDI prediction. It shows the interaction between the user, the prediction process, the stored model (`model.pkl`), and the generated output. The diagram represents the movement of data from input collection to prediction and result display.

DFD Symbol Legend

Symbol	Name	Description
Oval / Rounded shape	External Entity	User
Rectangle with numbered header	Process	Flask Application (/predict)
Rectangle (solid fill, no number)	Data Store	model.pkl (Trained Linear Regression Model)
Labelled arrow	Data Flow	User Input → Flask → Model → Prediction → Result

Example

The diagram below illustrates how the symbols above come together to form a complete data flow diagram.
