Project Name	A Comprehensive Measure of Well Being
Maximum Marks	5 Marks

Coding & Solution

This section evaluates the quality and completeness of your implemented code and the overall solution. Your submission should demonstrate working functionality, clean code practices, and alignment with your defined requirements.

Instructions:

1. The code is written using Python and Flask with a simple and organized structure. It includes comments for better understanding.
2. The application predicts the HDI score using Life Expectancy, Mean Schooling, Expected Schooling, and GNI, and displays the HDI category.
3. The project contains all required files, including `app.py`, `model.pkl`, `templates`, `static`, and `requirements.txt`. Run the application using `python app.py`.
4. GitHub Repository:

Solution Summary

Field	Details
Repository Link / URL	[Paste your GitHub / GitLab or hosted link here]
Programming Language(s)	Python
Framework(s) Used	Flask, NumPy, Pickle
Key Features Implemented	HDI Prediction, Classification, templates
Pending / Incomplete Features	Deployment, authentication
Setup / Run Instructions	Run <code>app.py</code> after placing <code>model.pkl</code>

Code Quality Checklist

S. No	Criteria	Status (Yes / No)
1	Code is modular and organized into functions / classes	Yes
2	Meaningful variable and function names are used	Yes
3	Code includes comments / documentation where necessary	Yes
4	Error handling is implemented for critical operations	Yes
5	The application runs without critical errors	Yes
6	Code is committed to a version control repository	No
