

Project Demo Planning

Date	2 July 2026
Team ID	XXXXXX
Project Name	A comprehensive measure of well being
Maximum Marks	1 Mark

Project Demo Planning:

The HDI Prediction System demonstrates how a Flask-based web application uses a trained machine learning model to predict the Human Development Index.

The demo showcases user input, real-time HDI prediction, and classification into the appropriate development category.

It also explains the application's workflow, technologies used, and the generated prediction results.

S. No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction	Introduce the HDI Prediction System, its objective, and the importance of predicting Human Development Index using machine learning	1	Shaik Saima Saniya
2	Technology Overview	Explain the technologies used: Python, Flask, HTML/CSS, NumPy, Pickle, and the trained machine learning model.	2	Syed Samiya Tasleem
3	Live Input Demonstration	Launch the Flask application, enter Life Expectancy, Mean Schooling, Expected Schooling, and GNI values through the web form.	2	Shaik Soniya
4	Prediction Result	Show the predicted HDI value and the corresponding category (Very High, High, Medium, or Low Human Development).	2	Shaik Sajidha
5	Code Explanation	Explain the Flask routes, model loading (model.pkl), input processing, prediction logic, and result generation	2	Shaik Saima Saniya
6	Conclusion & Future Scope	Summarize the project, discuss its benefits, limitations, and possible future enhancements such as cloud deployment and database integration.	1	Kalingiri Raju

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Explain the need for predicting Human Development Index and the project's objective.
2	Solution Overview	Describe the Flask web application, machine learning model, and technologies used.
3	Live Feature Demonstration	Enter sample values, run the prediction, and display the HDI score and development category.
4	Q&A Session	Answer questions related to the code, prediction process, output, and future improvements.
